

Canadian Mineral Processors  
BC/Yukon Branch  
2017 / 2018 Student Programme

## INTERNSHIP OPPORTUNITIES

Dear CMP colleague,

We intend to continue with the successful internship/work term programme implemented in 2015 and repeated in 2016.

This programme's objective is to generate student interest in pursuing a mineral processing career and to promote prospective employers within the CMP, to other members and, more specifically, to the new talent we wish to encourage into our industry.

If your company has specific work term / internship requirements for 2018 (or Q4 2017), you are welcome to contact us providing details such as:

- Proposed work, number of positions and expectations in terms of work outcomes,
- Whether you require the candidate(s) for a specific period or for "X" hours per week / month,
- Preferred dates and work location(s),
- Type of candidates you are interested in hiring; e.g. undergraduate, graduate or post graduate.

The CMP BC/Yukon Branch Executive intends to reach out to students, enrolled in under or post graduate studies, in early September 2017, inviting them to submit applications. The CMP executive would then provide you with a short list of suitable candidates. Successful candidates would then receive a letter, from the CMP, inviting them for final interview with yourselves.

If you wish to pursue this opportunity of filling internship positions, kindly send an email to [davidm@mintecprocess.com](mailto:davidm@mintecprocess.com) / [berge.simonian@metso.com](mailto:berge.simonian@metso.com), and we will follow up with you to clarify your requirements and timing.

Your soonest response would be appreciated

Yours, on behalf of the Canadian Mineral Processors - BC/Yukon Branch,

Berge Simonian  
Chair - CMP BC/Yukon Branch  
778-986-4987
